

Yes, adventure has a colour.

The Cross Polo, available in stylish colour variants, is all about on-road styling and off-road comfort. Even the paint finish is heavily guarded and treated to last. Only once we're done applying the initial protective layers, can the final coat make its way to the car.

The Cross Polo

Volkswagen. Das Auto.

The Cross Polo just got even bolder.
And more adventurous too.

The bolder avatar of the Polo took an exciting ride recently. And now, it's got more oomph to boast. With stunning design additions, enhanced by thoughtful touches to its sporty contours and lines. Very distinctive in style, yet very Volkswagen.

The Cross Polo is not one to see eye-to-eye with the mundane. Unlike other hatches, it stands apart as much for its dynamic styling as its technological breakthrough. Apart from the bold grille, shiny alloys, bumpers, dual-beam headlamps and roof rails, it now comes powered by a 1.5L TDI engine. Make your ‘everyday’ nothing like you’ve experienced before.

Dual-beam Headlamps

As far as perfect first impressions go, the Cross Polo is a shining example. Its front comes accentuated with a protective bumper and powerful dual-beam headlamps in black finish.

Side Cladding and ‘Cross Polo’ Badging

Functionality meets design, as stylish panels adorn the sides. Gravel, pebbles and other surprises from the road are no match for this protective layer. You see, confidence comes easy when you have protection. And fashionably so.

Silver Roof Rails

Possibly its coolest addition, the muscular silver roof rails give your ride an aesthetic edge. And, a meaner look. Though they are easy on the eyes, and on the drive.

‘Cross’ Rear Bumper

At the rear lies a stunning visual upgrade by way of the refreshed bumpers. Giving you unmatched safety, without compromising on looks. Even the emblem above it stylishly doubles up as the opening lever of the boot. Don’t blame us if traffic moves real slow around you then.

Electrically Foldable Mirrors

When it comes to the driver's point of view, everything spells perfection. Like the electrically foldable mirrors with turn indicators that you can adjust sitting right at your seat. The convenience of folding it with a touch, even in tight spaces.

Features and accessories shown may not be part of standard equipment

Sporty Dashboard and Multi-function Steering Wheel

Inside, the Cross Polo has more tricks lined up its sleeve. The jet-black interiors, for instance. And the sporty steering wheel, powers of which are known to transform even the dulllest of highways into speedy racetracks. It’s also reach and rake adjustable for added comfort.

Multi-function Console

Whether it's the smartly redesigned music player in the centre console or the climatronic air-conditioning right next to it, this car always thinks of you. In fact, you can now also connect your phone using Bluetooth to play music or make and receive calls using the Voice Command button on the steering wheel.

‘Safety First’ in the Cross Polo

With the Anti-lock Braking System (ABS), the car remains steerable, even during sudden braking manoeuvres, coming to a standstill as quickly as possible. Add to that, every car comes with Dual-front Airbags as standard for unparalleled safety. No wonder, it's one of the safest places on the road.

Cruise Control

Cruising on the highway is more pleasurable than ever. For your driving benefit, we’ve added the Cruise Control feature that allows you to maintain a steady speed without any added effort. Long drive, anyone?

Cooled Glove Box

What if we told you the glove box sitting in front of you had a cooling component? Well, that’s exactly the kind of thing you can now take advantage of. No matter how long the ride, you can keep your chocolate bars cold and your juice box fresh.

Engine and Transmission

Beauty meets power. And they live happily ever after. 1.5L TDI engine is a powerhouse of talent. A 4-cylinder beauty coupled with a 5-speed manual transmission. The engine is tailor-made with unearthly precision so that you get maximum power out of minimum consumption. (Also available in 1.2L Petrol)
