

The new CLS-Class Coupé.

Mercedes-Benz
The best or nothing.

The new-generation CLS-Class Coupé. Design. Illuminated.

How many times does one meet an exceptional personality in one's lifetime? If you wish, it can be every day – and on every drive. The new-generation CLS-Class Coupé captivates with its pioneering LED light system, its efficient, powerful engines, with an innovation in its transmission design and lots more. Surrounded by a design of precious rarity value. Discover the perfect symbiosis of light and form.

Strengths. Illuminated.

Outshines everything.

Coupés have always had that certain special something about them. But the Mercedes-Benz engineers wanted even more: a Coupé with four doors and comfortable rear seats. The unveiling of the original CLS marked the birth of a design icon, surpassed only by the new-generation CLS.

*Please read the disclaimer.

MULTIBEAM LED

LEDs are very much at the forefront when it comes to the future of lighting technology – due to their stronger luminosity and the rare semiconductor crystals. With their help, the luminous efficiency of LEDs can exceed that of conventional bulbs several times over. MULTIBEAM LED light system is equipped with 36 LEDs, of which

24 can be controlled individually. To this end, a camera positioned behind the windscreen surveys the current traffic conditions. Based on the information they receive, four control units calculate the ideal light pattern a hundred times per second and illuminate the LEDs precisely where light is needed almost instantaneously.

Perception-altering light.

New CLS-Class Coupé

At the airport you are ushered into the business lounge. On the train you can prepare for your next meeting whilst travelling at high speed. But the most pleasurable trips of all are at the wheel of the CLS-Class Coupé. The extensive range of standard equipment and appointments, including a 20.3 cm display, new interior colour schemes create special surroundings for special moments.

What makes a car a Mercedes?

Deep-rooted traditions: in our case, it is innovative traditions that run deep. We have continually gone down previously uncharted avenues. Milestone by milestone. These ventures spawned the first vehicle with a crumple zone, the first ABS, the first diesel car. The first automobile. But rather than wallowing in the past, let us look to the future.

Mercedes-Benz Intelligent Drive – on the road to accident-free driving. We develop intelligent assistance systems which actively support the driver and noticeably relieve the driver's workload. They monitor and analyse the vehicle's surroundings and handling – and warn the driver if they identify any critical situations. When necessary, some of the systems are able to intervene to take corrective action. Potential dangers are identified earlier than ever – and ever more frequently avoided as a result.

Our vision of emission-free driving. Sustainability is a big word to which we lend real meaning in all that we do, down to the smallest details. From minimising the environmental impact of our production operations to alternative drive concepts.

As you can see, we have major goals in our sights. And what could be better than seeing these aims achieved whilst on a long drive in a Mercedes?

Hungry rather than thirsty: the drive technologies

4-cylinder in-line engine. The 4-cylinder diesel powerplant, displays contemporary qualities, including impressively rich torque and low fuel consumption.

The current-generation common-rail diesel technology impresses by virtue of an injection pressure increased to up to 2000 bar, optimised combustion chambers, and extremely fast and precisely controlled piezo

injectors. High torque is available in every engine speed range. Thanks to the high ignition pressure and the turbocharger. The 4-cylinder diesel engine is available with: 150 kW [hp 204] and a maximum torque of 500 Nm in the CLS-Class Coupé.

Note : Not conducive for driving in Waterlogged roads with still water depth more than 25 cm.

Small speed increments, giant leaps forward: the 7G-TRONIC PLUS

7G-TRONIC PLUS. The New CLS-Class Coupé is equipped with the 7G-TRONIC PLUS 7-speed automatic transmission as standard. The transmission is controlled using the DIRECT SELECT lever, while the driver is able to influence the gear changes using the steering-wheel shift paddles. The seven forward gears allow an optimum engine speed at all times, thus helping to reduce fuel

consumption. Compared to the preceding 7G-TRONIC transmission, the electrohydraulic control unit has been enhanced, while the engine and transmission software has been optimised, resulting in further improved gearshift dynamics and gearshift quality. Furthermore, the 7G-TRONIC PLUS gives the driver more direct vehicle response to changes in the accelerator pedal position.

ECO start/stop. The engine is automatically switched off whenever the vehicle is at a standstill – in this simple way the ECO start/stop function achieves a considerable reduction in fuel consumption and emissions, for instance when stopped in a traffic jam or at traffic lights.

Smooths the way: the AIRMATIC air suspension system

With the **AIRMATIC** air suspension system, road unevenness practically dissolves into thin air.

In combination with variable damper control, it ensures ride comfort and dynamic handling at a very high level.

The damping at each wheel is adapted to the current driving situation, and can be set for more comfortable or sporty characteristics as required. Hardening of the spring rate, for example on bends and when braking, effectively

reduces rolling and pitching movements. Thanks to level control all-round, the vehicle maintains a constant level irrespective of the payload. The suspension level can be raised by 30 mm to increase ground clearance. At high speeds the suspension is automatically lowered by up to 20 mm, helping to reduce aerodynamic drag and improve handling stability.

24 new highlights: MULTIBEAM LED light system

Mercedes-Benz Intelligent Drive stands for the comprehensive networking of all the sophisticated technologies that assist and support the driver. One example of this is the **MULTIBEAM LED light system**, which can improve visibility in a wide range of conditions. In each headlamp, 24 out of a total of 36 LEDs are controlled individually. Using data supplied by a camera on the windscreen, specially developed control units calculate the ideal light distribution for every driving situation. This enables the headlamps to react extremely quickly to the current traffic situation. On detecting that the vehicle is on a motorway, MULTIBEAM LED additionally increases the range and light output – without dazzling oncoming traffic.

The active light function with preview function illuminates the bend before the steering wheel is turned and prior to leaving the bend again. And should fog impair visibility, the enhanced fog light function makes it easier for the driver to keep their bearings.

Essentials For Safe Driving

In high-beam mode, **Adaptive Highbeam Assist Plus** enables continuous long-range illumination of the road ahead without causing dazzle. When there are oncoming vehicles or vehicles in front, the LEDs of the MULTIBEAM LED main-beam modules are partially switched off,

VIEW EVERYTHING IN A NEW LIGHT

Even the standard **LED High Performance headlamps** enhance safety at night LED technology illuminates the road ahead better than conventional headlamps – and it uses less energy.

The **LED daytime running lamps** integrated in the headlamps and the **darkened LED tail lamps** with adaptive beam intensity have an unmistakable look even when visibility is good.

The **new headlamp design** in the MULTIBEAM LED light system creates a distinctive, unmistakable look.

Adaptive Highbeam Assist Plus (part of MULTIBEAM LED) allows main beam to be left on at all times without dazzling other road users. As a result the best possible headlamp range is always available to the driver. The function is active from a speed of 30 km/h on unlit roads.

When the car is unlocked, the **exterior welcome light** (part of MULTIBEAM LED) greets the driver with an extraordinary light show. Initially the headlamps flash yellow, then a blue LED is activated to highlight the “Mercedes-Benz” lettering, after which this transforms into the white locator lighting.

each creating a **u-shaped recessed light pattern**.

The other areas of the road continue to be illuminated with the high beam (**partial high beam**). When the system detects motorway conditions, an optimised high beam pattern is selected accordingly. The motorway high beam

reduces the risk of dazzling oncoming trucks and focuses the driver’s attention on his or her own lane. Depending on the road and traffic conditions, partial motorway high beam is activated to avoid dazzling other road users by using a specific recessed light pattern.

Park like a pro with the 360° camera

The **Active Parking Assist with PARKTRONIC** makes it easier to find a parking space and also to enter or leave parking spaces. When activated, it automatically steers the vehicle into parallel and end-on parking spaces, relieving the driver of the work of steering and braking. The **360° camera** included in the **Parking package** provides you with a realistic all-round view when parking and manoeuvring thanks to the

interaction of four cameras. The camera is switched on automatically when reverse gear is engaged. Alternatively, it can be activated by the driver if required. The vehicle and its immediate surroundings can be shown as a bird's-eye view in the multimedia system display. Obstacles below the window line are also visible to the driver. If the driver does not wish to use Active Parking Assist, the PARKTRONIC electronic parking assistance system

monitors the front and rear ends while the driver is manoeuvring the vehicle and warns the driver if a risk of collision is detected.

*Please read the disclaimer.

Mirror package: Heated exterior mirrors, left and right, electrically adjustable from inside.

Both exterior mirrors can be folded in and out electrically at the touch of a button, in order to protect the mirror housing from damage, e.g. during parking. For enhanced perceptual safety, the driver's exterior mirror features infinitely variable automatic dimming.

Ambient lights: Climb in and feel at home – with its pleasant, indirect light, the ambient lighting creates an unrivalled sense of well-being throughout the entire interior. 3 different colours are available to achieve the desired lighting mood. The brightness can be dimmed to any level.

*Please read the disclaimer.

Electric sliding sunroof: The electric sunroof provides a pleasant, draft-free circulation of air in the passenger compartment. As it is made of glass, the sunroof also gives the interior of the vehicle a brighter feel. A movable headlining affords protection against the sun. If it starts to rain, the roof automatically moves to the raised position.

THERMOTRONIC automatic climate control: With three zones, including utilisation of residual engine heat, fine-particle activated charcoal filter to reduce dust and odours, separate temperature control for driver/front passenger and rear, FOCUS, MEDIUM, DIFFUSE individual climate modes, air quality sensor with automatic air recirculation, dew point sensor, control unit in rear with temperature control and booster blower for ventilation of rear passenger compartment.

Harman Kardon® Logic 7® surround sound system

includes 9-channel DSP amplifier and 2-channel booster with a total output of 610 watts in conjunction with 14 high-performance loudspeakers, Dolby Digital 5.1 and DTS listening experience.

COMAND Online Navigation, telephone, audio, video, internet – with the COMAND Online control and display system the driver is able to keep these and many other functions in view and under control. Information is shown in colour on a 20.3 cm high-resolution Media Display. Operation is simple and intuitive.

- Control and display system for navigation, telephone, audio, video, internet and many more functions
- Fast, dynamic hard-disc navigation with realistic topographic map display

- DVD player, radio
- Bluetooth® interface with hands-free function, text message reading function and audio streaming for music transfer
- LINGUATRONIC voice control system for audio, telephone, navigation, music and search
- 2 USB ports in the centre armrest and an SD card slot in the COMAND control panel
- Transfer of addresses from mobile phone to head unit
- Cover Art: Display of album covers in audio menu

The reassuring feeling of driving a Mercedes-Benz

We are the first automobile manufacturer worldwide to have developed an integral safety concept, aimed at avoiding accidents, ensuring ideal responses to dangers and lessening the consequences of accidents. For the occupants of a Mercedes-Benz and for all other road users, too.

Safe driving

The **ATTENTION ASSIST drowsiness detection system** serves to enhance driving safety in particular on long trips and during night-time driving. It can monitor the steering behaviour of the driver to recognise typical signs of drowsiness and severe loss of attention, and give a visual and audible warning of impending microsleep.

The **ADAPTIVE BRAKE system** enhances ride comfort and safety. With the anti-lock braking system (ABS) as a base function it helps the driver to master critical braking manoeuvres more safely, and also assists the driver with day-to-day convenience functions such as Hill-Start Assist.

In the event of danger

The **PRE-SAFE®** anticipatory occupant protection system is able to identify critical driving situations in advance and to initiate precautionary measures to protect the vehicle's occupants when there is imminent danger of an accident. Such measures include reversible belt tensioning or automatic closing of the side windows.

In an accident

Extensive restraint systems can substantially reduce the risk of injury. These include three-point seat belts with pyrotechnic belt tensioners and belt force limiters. Furthermore, the **NECK-PRO head restraints** on the front seats are actively raised and moved forwards in the event of a rear impact to provide early support for the occupants' heads and reduce the risk of whiplash injuries. Numerous airbags protect the occupants in the event of an accident and can reduce the risk of serious injury.

8 Airbags

During a collision the airbags help to protect the head and torso of the driver and front passenger. In addition they stabilise the entire body. This can reduce the risk of severe injuries in an accident. Activation is suited to the severity of the impact.

Turning the design icon into a designer piece

A Mercedes-Benz is always something special. But this stylishly matched combination of choice materials and lavish details means that even the aesthetics of a CLS-Class Coupé can be further enhanced.

Genuine accessories

Illuminated Star

Let your Star shine. Thanks to fibre-optic cables and LED technology, the central star emblem in your Mercedes' radiator grille lights up when you remotely lock/unlock the vehicle or open the door or tailgate. Only functions when engine is switched off.

Illuminated Star

Genuine accessories

Rear Seat Entertainment system

This elegant DVD system allows the rear passengers to watch DVDs, look at their favourite pictures and even play video games on two superb 17.8 cm screens with TFT technology, without disturbing the driver or restricting the rear field of vision. Rear-seat passengers have the option of watching a different video source on each screen, allowing each to select their own individual entertainment. The AV-IN connection and USB and SD card interfaces allow other storage media to be used too. Supplied with two sets of infrared headphones and remote control. A separately available video cable allows users to watch videos or view images from external sources.

Rear Seat Entertainment system

Genuine accessories

Sports pedals in brushed stainless steel

High-quality appearance giving a refined, sporty look. Manufactured using high quality stainless steel with non-slip stud inlay which is extremely hardwearing and durable. Thanks to optimum selection of materials and safety-tested to Mercedes-Benz's very high standards.

Apple iPad2® - iPad4® Docking Station, Rear Kit

The ergonomic, crashproof Docking Station introduces the iPad® and all of its familiar functions to your Mercedes-Benz. All connections, e.g. for your headphones or charging cable, remain accessible. The mount is fitted to the head restraint and can be tilted and rotated around 90°. Available for iPad®, iPad® 2, iPad® 3 and iPad® 4.

Apple iPad2®-iPad4® Docking Station, Rear Kit

Floor Mats

The all-season floor mats in the new CLS-Class Coupé are robust, washable and designed for heavy use. Their curved line design comes with the distinctive Mercedes-Benz star logo which are available in black.

Floor mats

Genuine accessories

Coolbox

Not only cools but warms too. Cools it up to 20°C below ambient temperature – to max. -2°C. Can be switched to warming function also. Robust, highly insulated hard case with fabric cover, outside pockets and padded shoulder strap. Capacity: 24 litres. Can be connected to 12 V socket in vehicle or to 230 V power source via separately available rectifier.

Coolbox

Rectifier

Allows the coolbox to be connected to a 230 V socket at home.

Rectifier

Universal hook, Style & Travel Equipment, black, plastic

The head restraint elements are simple to fit and remove. The modular system centres around a base support which can be combined with various products – a coat hanger, a universal hook or a folding table.

Universal hook

Service

The luxurious experience of driving a Mercedes-Benz is converted into a fulfilling ownership experience with a range of exclusive services and special programmes.

Cost of Ownership

There has been a paradigm shift in the buying preferences of Indian consumers over the years, even for the luxury products. The purchase decision not only dwells around cost of acquisition but also the total 'Cost of Ownership' (COO). Amongst the key components of COO in cars are the routine service jobs and the unplanned repair expenses post the warranty period. We are now offering highly affordable Service Packages and Extended Warranty

Programmes which includes a **standard 2 year warranty along with a 1 year extended warranty** and is considered as the most competitive packages in its class. All in all, we provide you with a controlled Cost of Ownership while you benefit from the legendary Mercedes-Benz service quality.

STAR CARE

Experience complete peace of mind when you drive the Star. STAR CARE programme offers peace of mind drive for you during warranty period and beyond. While our cars are covered for warrantable repairs up to 3 years without any mileage limitations, as standard, you can also buy STAR CARE Plus programme, offering 4th year extended warranty. Additionally, the programme enhances the resale value of your car.

Extended Warranty that guarantees complete peace of mind

STAR EASE

STAR EASE Service Package gives you the freedom to relax behind the wheel and puts your mind at ease with its range of unique benefits such as defined cost of maintenance and priority handling. STAR EASE Comprehensive package covers essential jobs related to periodic service (viz. oil, filters, consumables, etc.) along with coverage for brake pads, brake discs, wiper blades and wheel alignment & balancing, for a contracted period. For further details on products and pricing, please contact your nearest Mercedes-Benz dealer.

The maintenance of your Star is just as peaceful as driving it

On-Road Assistance Programme

As part of our ongoing commitment to you, Mercedes-Benz On-Road Assistance is designed to enhance your overall Mercedes-Benz ownership experience by providing you with 24 hour On-Road Assistance. Mercedes-Benz is the only Luxury car manufacturer to offer round-the-clock On-Road Assistance for **3 years** from purchase of vehicle as a **standard offering**. Peace of mind motoring – guaranteed.

Always at your service

Conditions apply.

India's Largest Luxury Car Network

It takes a keen sense of responsibility to provide the best in service – our large network is spread across the country in 38 cities with 102 touchpoints and is still growing. With world-class showrooms, state-of-the-art workshops and highly skilled personnel, experience the best wherever you go.
